

It's a great day in Arbor Vitae when the broadband is a day closer to being active! We want to notify residents that you will see plenty of Charter/Mastec activity in your neighborhoods in the next few months. We will have another update during the first part of July.

There is much to be excited about as the next roll out from the federal government should be approximately 400 million in grant dollars. We can apply for a portion to expand even further. We are working to bring broadband to the more rural parts of Arbor Vitae.

If you have questions please feel free to contact the committee chair, Town Supervisor Pamela Carroll @ Pamela.carroll96@yahoo.com.
